EDITORIAL

Dear investors,

French Polynesia, located in the heart of the South Pacific, represents an exclusive economic zone as vast as Europe, with 5 million km² of opportunities to explore. With a slogan that's already resonating in people's minds: "Invest in The Islands of Tahiti", we invite you to seriously consider your next great investment adventure.

Why invest in Polynesia ? Our archipelagos, with their breathtaking landscapes and crystal-clear lagoons, are more than just postcard destinations. They embody an authentic country, rich in culture and tradition, yet resolutely focused on the future. You'll discover an ocean of opportunities just waiting for you.

The tourism sector, in particular, is booming. With "The Islands of Tahiti" brand firmly anchored in the consciousness of travelers, demand for hotel-restaurant and cruise projects is booming. In fact, tourism accounts for almost 20% of Polynesia's GDP, attracting hundreds of thousands of visitors every year. By joining us, you'll be contributing to our ambition to become a leader in the fast-growing niche of cultural and sustainable tourism.

In addition, the climatic diversity of our territory, stretching between the 8th and 27th degrees south latitude, offers a range of natural riches to be exploited. The northern Marquesas, with its arid tropical climate, is ideal for growing citrus fruits, while the southern Australs enjoy a temperate climate conducive to other crops. Imagine the potential for investment in high value-added agricultural products for overseas markets!

Polynesia's energy future is equally promising. Our ambitions in renewable energies, such as solar power and ocean thermal energy, offer innovative investment prospects. By becoming pioneers in the energy transition, you will play a key role in the sustainability of our environment.

The audiovisual and digital sectors are booming, positioning Polynesia as a potential telecommunications hub. A hub strengthened by Google's decision, along with Fiji, to include French Polynesia on its Pacific deployment map, with the installation of 8 cables. Today, linked to the world by two international cables and a robust domestic network, we are in a position to develop the digital platforms of tomorrow. The creativity and talent of our people are major assets in attracting investment in these fields.

Investing in Polynesia also means joining a committed and ambitious population, ready to meet the challenges of tomorrow. Thanks to our political stability and sound monetary system, you can be sure of working in a peaceful environment, focused on clear, structured economic and social development.

Our country, with its strategic position in the vast Pacific Rim, is perfectly connected to European, North American and Asian markets. We have put in place modern infrastructures and attractive tax incentive policies to facilitate your investment.

The Economic Development Agency is here to help you discover our country and simplify the process.

Looking for new opportunities? Choose French Polynesia, a land of infinite possibilities.

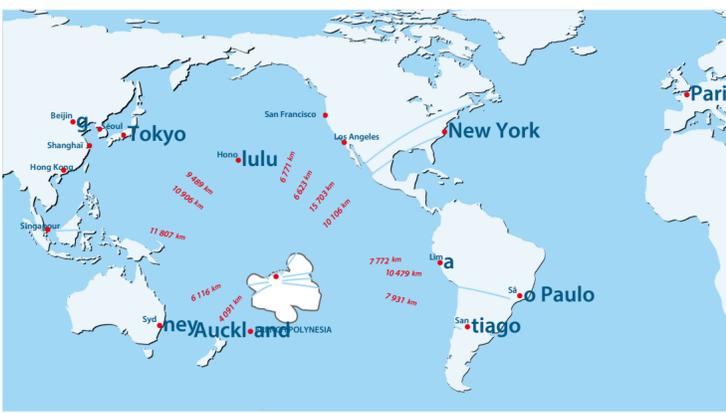

We look forward to writing this new chapter together.

Moetai BROTHERSON
President of French Polynesia

OVERVIEW OF FRENCH POLYNESIA

A UNIQUE STRATEGIC POSITIONING

Located at the heart of the Pacific Ocean, French Polynesia offers a spectacular natural environment and a rich culture, all within a safe and peaceful setting. With 118 islands spread across an area equivalent to that of Europe (5.5 million km²), it boasts modern infrastructure that meets international standards, particularly in transport, healthcare, and telecommunications, ensuring optimal connectivity.

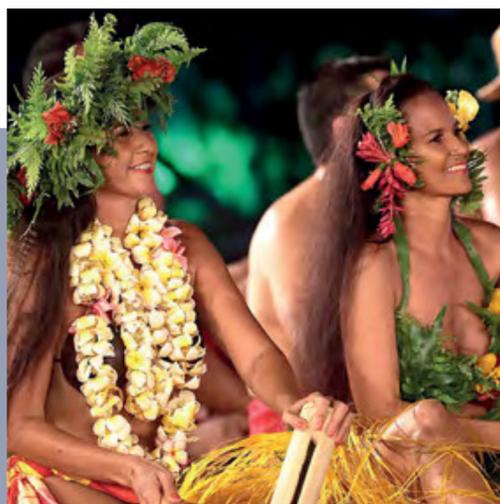

AN AUTONOMOUS OVERSEAS COUNTRY IN A STABLE MONETARY AREA

French Polynesia is an overseas country that is part of the French Republic. With extended political autonomy recognised by the French Constitution, it governs itself freely and democratically. The French State is responsible for the sovereign powers. Parity with the Euro (1 EUR = 119.3317 XPF) is guaranteed by the French government within an area that offers monetary stability. French Polynesia has full freedom regarding transfers and unlimited convertibility.

AIRPORT AND PORT INFRASTRUCTURE

French Polynesia has been able to acquire equipment and infrastructure adapted to the requirements of its economic development and its geographic specificities. French Polynesia has comprehensive air services providing daily connections to most major destinations via its international airport, with easy access from Europe via the West Coast of the United States and South America, Australia, Japan, New Zealand, Fiji, Hawaii, New Caledonia, Chile and the Cook Islands. Domestic airline Air Tahiti operates regular air services to/ from more than 40 islands. In 2018, Air Tahiti Nui launched its first subsidiary transport company "Helicopters Tahiti Nui", with diverse, on-demand offer of services. Papeete port is the logistics hub for Tahiti and her islands. It provides a natural protective harbour for cargo ships, container vessels and tankers arriving from abroad and for a fleet of inter-island smaller vessels regularly serving the 5 archipelagos. It is also a port of call for many international cruise ships that regularly sail across our islands.

A young, dynamic and skilled population

The low average age of the population (less than 36% of the population <25 years of age) promotes economic dynamism across all of French Polynesia. Polynesian youth are becoming more skilled, with higher and university education.

Human and cultural richness

The warmth of the Polynesian population adds to a preserved and living culture. Polynesian languages are studied and widely spoken. Arts are dynamic and constantly on the move. The cultural authenticity of the islands is actually what attracts tourists.

An exceptional natural environment

The 5 archipelagos boast unparalleled diversity of landscapes, high islands and atolls, offering a wide range of unique, original and diverse tourism products. This environment offers a unique and privileged living environment for expatriate staff.

TOURISM: A BOOMING SECTOR

Tourism plays a central role in the Polynesian economy. It is French Polynesia's leading export resource, with revenues of around 99 billion XPF, i.e. around 14% (source: ISPF) of Polynesian GDP in 2023, and employs nearly 13,150 people (IEOM 2023). In 2023, this sector includes more than 5,200 companies (i.e. 15% of all Polynesian companies), generating 17% of the country's total business sales.

International air transport

The aim is to open up Polynesian skies. The country has already initiated aeronautical discussions with the United States, China, Europe, Japan, Canada, Australia and New Zealand. Tahiti has direct flights to Japan (Narita), the USA (Los Angeles, San Francisco and Seattle), New Zealand (Auckland), the Cook Islands (Rarotonga), Hawaii (Honolulu), Fiji (Nandi) and secondary connections to Europe via Los Angeles and Paris, Mexico and South America via Los Angeles, Australia (Sydney) via Auckland and New Caledonia (Nouméa) via Fiji.

Accommodation

Accommodation accounts for around 57% of tourism spending (in 2023: ISPF). 48 international hotels operate in French Polynesia in 2025. They offer an average of 2,749 rooms a day, 55% of which are located in the Windward Islands and 38% in the Leeward Islands. 87% of hotels are located in Tahiti, Bora Bora and Moorea, with an average occupancy rate of 68% across all categories. Bora Bora accounts for 32% of the total. 298 guesthouses, 46 tourist establishments and miscellaneous accommodations,

as well as 2,414 vacation rentals and 3 luxury villas complete the receptive offer, for a total capacity of 7,918 rooms.

Hotels are mostly made up of traditional Polynesian-style bungalows, with a requirement to use pandanus roofing for 4-star hotels and above. Small family-run accommodations are widely represented across all the archipelagos, welcoming tourists in a warm, family-friendly atmosphere that reflects the tradition of Polynesian hospitality.

Sailing and charter sailing

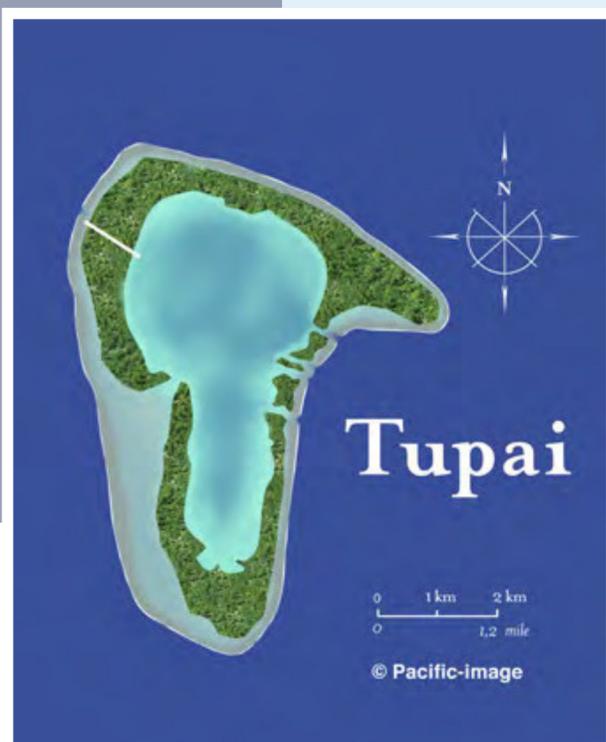

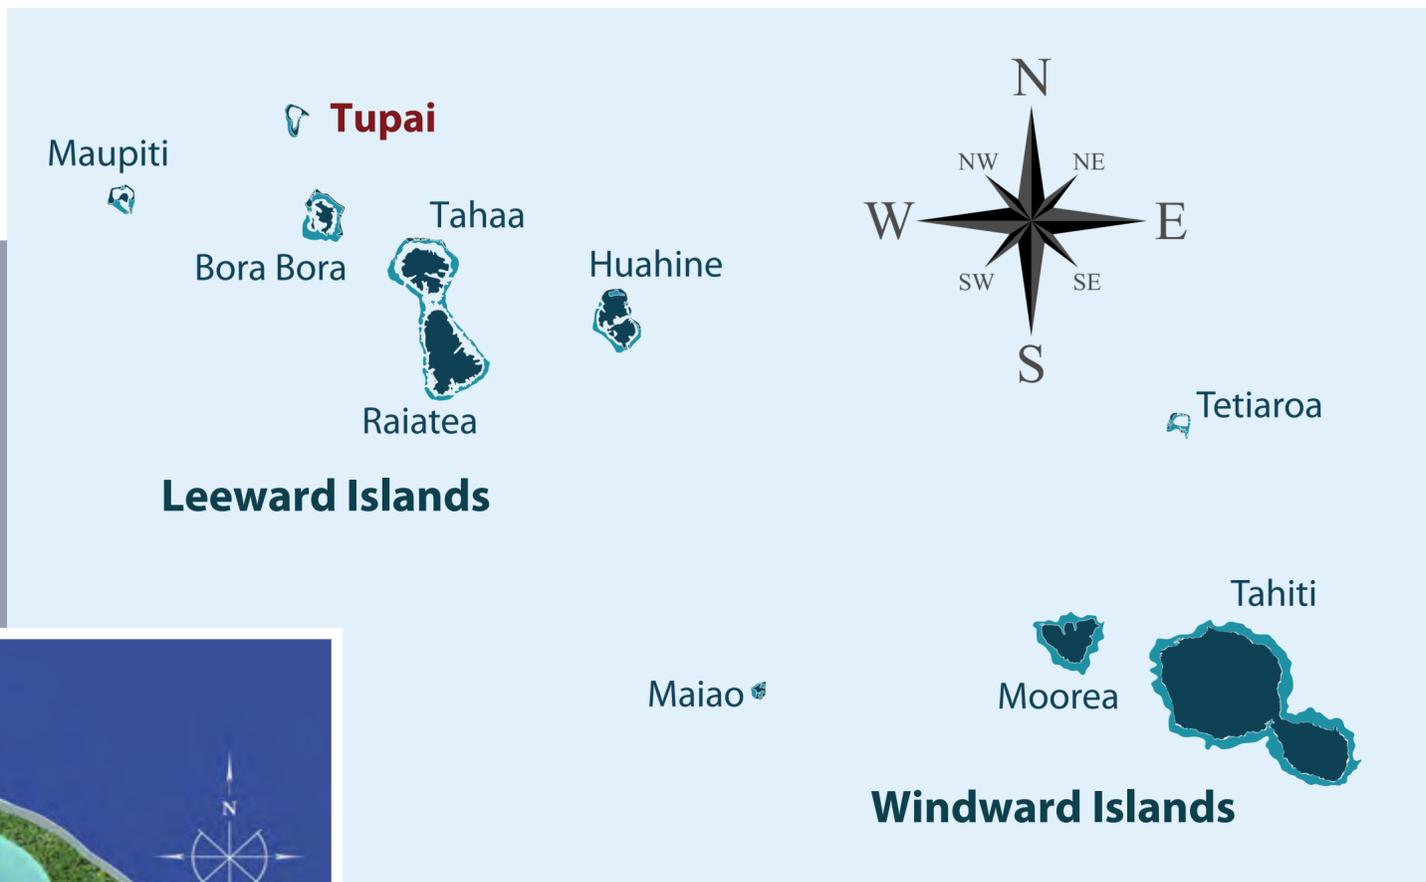

French Polynesia has always been a haven for sea travellers. Its protected environment and leading-edge port infrastructure make it a premium destination for ships and sailing vessels based in the waters of its welcoming Islands.

Cruise and nautical tourism generate major benefits, contributing to the promotion of the image of Tahiti and her islands worldwide. During the last decade, French Polynesia has made cruise tourism a development priority. With two large cruise ship piers in the roadstead, Papeete Harbour is a true international cruise port, able to simultaneously accommodate 4 visiting or French Polynesia-based cruise liners. In addition, a project planning to build an international cruise terminal aims to strengthen head-end capacities and improve the management of arrivals and departures. Charter sailing is also booming. It is an alternative option to standard hotels. It is the subject of all the attention and support of the Government of French Polynesia. The fleet is constantly being modernized and offers multiple options to discover the Polynesian archipelagos.

TUPAI

THE HEART OF THE OCEAN, OPENS TO THE WORLD

A few miles away from legendary Bora Bora, Tupai atoll is, along with Tetiaroa, one of the only two atolls of the Society archipelago. A single atoll, uninhabited and unspoiled. It is, according to Polynesian mythology, dedicated to Pere, the goddess of fire and passion ... This goes perhaps beyond the legend when you see the incredible shape formed by the crystal-clear lagoon: a heart as a tribute to the goddess, an evocation of romanticism and the obvious justification of its nickname: Tupai, the heart of the ocean.

Devoid of any human presence, Tupai has become over time a haven of peace and tranquillity. Its natural habitat, beautiful native coconut plantations, its exceptionally pure blue lagoon and idyllic white sand beaches have made it today an island that is mysterious and wild, enchanting and irresistible.

A UNIQUE OPPORTUNITY IN THE WORLD

This is breaking news: Tupai opens to the world today. A modern airstrip was built and the channel to the lagoon was designed to allow the entry of yachts. These significant developments have been conducted by the Government of French Polynesia, as the owner of the atoll, with the sole purpose of facilitating tourism development and to lay the foundations for a major project. Resolutely reserved for a very upscale hotel project, Tupai represents a very rare opportunity: to benefit from the immediate charm of a jewel set on the deep blue of the ocean and enjoy the advantages, in addition to the Polynesian status and reality, of a selection of aids and motivating incentives.

THE LAST PARADISE...

Tupai is a coral island of 11 km², located just 16 km north of Bora Bora. It is a special atoll, first because of its almost perfect heart shape that one discovers when flying above, then because of its double lagoon and incredible shades of blue, but also because of its preserved nature. Here the birds nest on the ground without fear, sea turtles lay their eggs in pristine white sand beaches and fauna and flora have slowly forgotten man. It is a place where time is suspended, a virgin island as only few remain on our oceans. The atoll was once a coconut plantation, owned by Mr. Lejeune, a notary in Papeete. Then it was bought by the Government of French Polynesia, and the atoll became government-owned property in order not only to preserve its heritage but also to protect its exceptional nature. There was a time when the atoll was also used to welcome high-ranking visiting dignitaries.

THE END OF THE WORLD BECOMES ACCESSIBLE

From its ancient history, the island has retained only the most useful infrastructure. Thus, the airstrip built by the first owner was redesigned in 2003 by the Government. Its dimensions were increased from 730 to 900 metres in length and 12 to 23 meters in width. Such dimensions are adapted to a tourist exploitation of the island, both regarding transport of passengers and logistics: special or regular refuelling. It was also in 2003 that the Government created a passage (a channel) in the north of the island. This channel did not alter the ecosystem of the atoll as it was already open onto the ocean through several hoas, shallow channels. This 10 metre-deep by 10 metre-wide channel already makes it possible for yachts to pass but it can be developed in order to accommodate larger boats. These developments that are already compliant with international standards place this preserved atoll at one hour flight from Papeete and a few minutes from Bora Bora, its famous neighbour.

MORE THAN A **DESTINATION**, MORE THAN A **DREAM ATOLL**

Few tourism opportunities enclose so many benefits. Tupai, in addition to its natural and unspoiled beauty, has an airstrip and a channel, and is close to a legendary destination: Bora Bora, the Pearl of the Pacific. It especially uses its iconic heart shape to promote its image, its communication and unparalleled charm targeted at what constitutes the heart of Polynesian tourism: romantic and wedding tourism.

... AN EVOCATION OF PARADISE

Soon open to cruise ships, yachts and chartered boats, the Atoll of Tupai is particularly suitable for the implementation of a high-end complex that would crown it as a true major destination for international customers in search of the exceptional.

We propose that we build together this new project, by making available not only the resources of the atoll and the land required, but also to assist you through dedicated services and specific support to ensure a mutually profitable success.

PROJECTS SUPPORTED BY THE GOVERNMENT OF FRENCH POLYNESIA

Determined to support the development of remote islands and enhance the environmental heritage of the Leeward Islands in particular, the Government makes plots of land available to project developers of all kinds, responding to business creation objectives, attractiveness and with respect for the site itself.

The Government of French Polynesia will support investors, developers and contractors allowing them to benefit from dedicated aid and tax measures, the provision of land, under specific conditions and depending on the nature of the project.

VERY ADVANTAGEOUS PRICING FOR THE PUBLIC DOMAIN

The Government of French Polynesia owns, in Tahiti and the outer islands, extended terrestrial and maritime public domain which it can make available to any interested investor for any developmental project such as: golf courses, marinas, pontoons, over-water bungalows, diving centres, etc. Except in special cases where there are pre-established pricing grids, the Council of Ministers may decide to tailor pricing and adjust the amount of royalties to the investment effort made by the holders of occupancy permits. It can even fix a reduced fee or a fee waiver during the pre-construction and construction phases.

INVESTMENT INCENTIVE MEASURES

Structuring investment projects carried out in French Polynesia can benefit, under certain conditions, from public support measures through, on one hand, the Polynesian tax exemption scheme or incentive measures for major investments, and on the other hand, the national tax exemption system.

■ NATIONAL TAX-EXEMPTION SCHEME

The French State supports the economic development of French Polynesia through a tax exemption system specific to the region (Overseas Tax Exemption or LODEOM). This fiscal aid scheme applies to investments made in overseas territories in so-called "productive" sectors and "housing" projects. The "housing" category mainly refers to the construction of new residential properties for primary residence, benefiting individuals whose income does not exceed certain thresholds. Exclusions concern, among others, commercial activities, restaurants (excluding classified tourism restaurants), consulting or expertise services, research and development, education, healthcare, banking,

finance, and insurance, as well as non-profit activities, postal services, sports and cultural activities, etc. The tax benefit applies to taxpayers domiciled in mainland France who contribute to financing eligible investments. The financial benefits are as follow :

- > Individual investor: Reduction of income tax between 44.12% and 54.36%, with at least 56% of the benefit being retroceded to the overseas business, which thus receives a tax advantage of at least 24.71%* ;
- > Corporate investor: Deduction from taxable income or a 35% reduction in corporate tax, with 80% of the benefit being retroceded to the overseas business, which thus receives a tax advantage of at least 28%*.

*Based on the pre-tax amount of eligible investments.

■ FRENCH POLYNESIAN TAX-EXEMPTION SCHEME

The tax incentive measures for investment outlined in the Investment Code of French Polynesia form a support system to promote the development of major projects. This system significantly reduces the financial burden on project developers. It allows them to benefit from financial participation from third-party companies, covering an amount between 22.5% and 30% (depending on the sector) of the eligible investment amount excluding tax. In return, these companies are entitled to a tax credit ranging from 30% to 40% of the eligible base portion invested, which they pass on at

least 75% to the project developers, resulting in a maximum tax gain of 30% of the actual amounts invested.

NATURE OF FINANCINGS	XPF MF AMOUNT
Equity capital	10
Bank loan	60
Local tax-exemption contribution	30
TOTAL	100

(1) Calculation: approved base eligible for tax exemption (XPF MF 100) X tax credit rate for the eligible sector (ex: 40%) X project's rate of retrocession (75%)= XPF MF 30

IN ITS IMPLEMENTATION, THE POLYNESIAN TAX EXEMPTION SYSTEM OFFERS TWO REGIMES:

1/ INDIRECT INVESTMENTS

Investments made in French Polynesia may be eligible for the tax exemption system, provided specific criteria related to the sector of activity are met. Individuals or entities liable for corporate tax or gross revenue tax, who participate in financing investment programs in one of the eligible sectors approved by French Polynesia, benefit, under certain conditions, from a tax credit.

2/ DIRECT INVESTMENTS

Corporate entities subject to corporate tax or gross revenue tax can benefit from a tax advantage, in the form of a reduction in corporate tax, income tax on movable capital, or on rights and taxes, when they directly carry out and finance an investment program approved by the council of ministers, without resorting to third-party investors.

To benefit from this tax advantage, the investment program must be approved by the Council of Ministers. After the approval, the project owner calls upon "tax-exempt investors" (individuals or entities subject to gross revenue tax or corporate tax in French Polynesia) who, in return for their contributions to financing the project, benefit from a tax credit that can be applied in the fiscal year during which the financing occurs, with the remaining balance applied over the next five fiscal years.

■ CUMULATION OF BOTH TAX-EXEMPTION SCHEMES

Subject to project eligibility for both schemes, project sponsors can benefit from the combined support of both tax exemption schemes. They must submit their applications to the DICP (Polynesian tax exemption) and to the DGFIP in Paris (national tax exemption).

By combining both schemes, depending on the sector, it is possible to obtain more than 52.4% of aid on the eligible investment amount (75% of the 30% Polynesian tax credit + 66% of the 45.3% metropolitan tax reduction, minus application fees).

The following example presents a typical financing plan using dual tax- exemption:

NATURE OF FINANCINGS	XPF MF AMOUNT
Equity capital	10
Bank loan	30
Local tax-exemption contribution	30
National tax-exemption contribution	30
TOTAL	100

■ THE TAX INCENTIVE SYSTEM FOR LARGE INVESTMENTS

In order to encourage large-scale investments that generate jobs in French Polynesia, a system consisting of long-term tax exemptions has been implemented by the government, alongside the tax relief program.

To benefit from this system, investment programs must be carried out in the strictly defined Priority Development Zones (ZDP) and are subject, like the tax relief program, to approval by the Council of Ministers of French Polynesia. The minimum investment threshold is 10 billion XPF excluding taxes.

The system provides for two types of ZDPs, which will determine the duration of the tax exemptions: ZDP1 (islands of the Society Archipelago) and ZDP2 (islands of the other archipelagos).

The approval of investment programs is subject to meeting certain conditions, including the feasibility of the proposed investments and the creation of jobs. The investment approval decree specifies the exemptions on imports as well as the internal regime exemptions granted.

THE SYSTEM GUARANTEES LONG-TERM TAX EXEMPTIONS UNDER THE FOLLOWING CONDITIONS:

	TAX EXEMPTIONS	
	ZDP1 SOCIETY ARCHIPELAGO	ZDP2 OTHER ARCHIPELAGOS
Import duties and taxes (excluding airport tax)	At the completion date of the investment program	15 years 30 years if the program \geq 30 Billion*
Property tax (excluding municipal fees)	10 years 15 years if the program \geq 30 Billion*	15 years 30 years if the program \geq 30 Billion*
Business tax (excluding municipal fees)	10 years 15 years if the program \geq 30 Billion*	10 years 15 years if the program \geq 30 Billion*
Corporate Taxes (IS, CSIS, IMF, IRCM)	10 years 15 years if the program \geq 30 Billion*	10 years 15 years if the program \geq 30 Billion*
Withholding tax	Investment Program Realization Period	15 years if the program \geq 30 Billion*
Registration and transcription fees	5 years	Investment Program Realization Period 5 years

*billion : billion XPF

In order to reduce transportation costs due to geographical remoteness, the scheme extends the exemption from import duties and taxes to diesel fuel, upon request from the investor. Important: This scheme is not cumulative with the Polynesian tax exemption scheme. However, it can be combined with the national tax exemption scheme if the investment project falls within an eligible sector.

THE ECONOMIC DEVELOPMENT AGENCY OF FRENCH POLYNESIA

The Economic Development Agency of French Polynesia (ADE), a public department operating under the supervision of the Ministry of Economy, is a true "one-stop shop" for foreign investors. Privileged contact between project initiators and the institutional entities of French Polynesia, the ADE offers you a free support and follow-up all the administrative procedures required by your project.

ITS MAIN MISSIONS:

- **To propose** and manage economic development strategy development strategy;
- **To promote** investment and development in priority sectors;
- **To develop** a territorial marketing strategy aimed at promoting the local environment as a favorable breeding ground for the economy and businesses;
- **To facilitate** synergies within local development sectors;
- **To contribute** to the development of new Polynesian businesses;
- **To develop** business traffic between French Polynesia and the rest of the world;
- **To promote** the economic influence of French Polynesia, notably through integration into networks dedicated to development and by networking Polynesians abroad;
- **To encourage** and support the growth of business competitiveness and productivity, in particular by identifying and developing talent, and projecting the necessary skills.

THE ADE ALSO TAKES CHARGE OF:

- Processing of requests for recommendations relating to applications for approval under the Investment Code (local tax exemption) ;
- Examining requests for the country's opinion on applications for overseas investment tax assistance for projects carried out in French Polynesia (national tax exemption);
- Contributing to actions that support, structure, and develop innovation in French Polynesia.
- Steering the structuring and development of the social and solidarity economy in French Polynesia.
- Managing the Polynesian Export Team to support the internationalization of Polynesian companies;
