### Disease Free Certification Statements for Tahiti – French Polynesia

Shell Egg Grading Certificate No. SEA - \_\_\_\_\_ Dated: \_\_\_\_\_

“The U. S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services certifies that:

No cases of notifiable avian influenza (NAI), including the highly pathogenic subtype H5N1, and no cases of velogenic Newcastle disease (VND) have been reported in commercial laying chicken flocks in the county(ies) of origin where the eggs originated for the 3 months preceding departure of this consignment. These eggs were produced in the county(ies) in the state of \_\_\_\_\_ identified below:

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

The shell eggs covered by this certificate were produced by birds originating from Salmonella enteritidis (SE) -certified breeding flocks which have not been identified within 90 days before shipment by the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, as being infected with SE, including SE phage type 4.”

The shell eggs covered by this certificate meet U.S. Department of Agriculture, Agricultural Marketing Service quality grade standards. To meet this grade standard, shell eggs for human consumption undergo a washing procedure that includes a sanitizing step to address exterior grade defects which also addresses surface risks associated with Salmonella Typhimurium.
